

Available colours

RAL 7044

RAL 8025

RAL 5024

RAL 6011

RAL 7047

RAL 1002

Information about the product

Dimensions	123 x 123 cm
Overall height	42 cm
Availability of spare parts	Tak

Technology

A technology that enables **HDPE polyethylene** to be formed into designer furniture from the **Outi collection**. As a result, each piece is both durable and unique.

Warranty

Lifetime

The warranty covers the durability of components made of HDPE (high-density polyethylene), as well as the structural integrity of components made of black steel that has been powder galvanised and powder coated, stainless steel, and components made of hot-dip galvanised steel.

10 years

The Guaranty covers all flaws of the elements made of HPL, HDPE, stainless steel, hot-dip galvanized steel, wooden elements (pine, spruce), revealed during usage, which arise from manufacturing reasons.

5 years

The Guaranty covers all flaws of the elements made of powder coated steel, aluminum, laminate, ropes, elements made in rotomoulding technology, elements made of polyamid, polypropylene elements, revealed during usage, which arise from manufacturing reasons.

2 years

The Guaranty covers all flaws of the elements made of rubber, moving elements (bearings, joints), electronic elements, elements made of EPDM, elements made of plywood and other not mentioned before revealed during usage, which arise from manufacturing reasons.

Product description

6502 Curved Bench

Dimensions:

- Product dimensions: 123 x 123 cm
- Overall height: 42 cm

The Curved Bench is a module with a rounded geometry, allowing for the creation of organic compositions. It enables the formation of semi-circular or closed arrangements that encourage user interaction and naturally guide movement within a space.

It is part of a series of modular furniture designed for public spaces, characterised by high durability and configurational flexibility. The forms are based on smooth lines and rounded geometric transitions, enabling the creation of cohesive arrangements with varied functions and scales. The collection is manufactured using rotomoulding technology with HDPE (high-density polyethylene) granulate, ensuring a uniform material structure, high mechanical resistance, and durability under intensive use. At the same time, it provides resistance to UV radiation, moisture, temperature fluctuations, and mechanical damage, making the elements suitable for both indoor and outdoor environments.

Installation method

Materials

Rotomoulding technology with HDPE (high-density polyethylene) granulate, ensuring a uniform material structure, high mechanical resistance, and durability under intensive use. At the same time, it provides resistance to UV radiation, moisture, temperature fluctuations, and mechanical damage.
