

### Available colours

**RAL 7044**

**RAL 8025**

**RAL 5024**

**RAL 6011**

**RAL 7047**

**RAL 1002**

### Information about the product

Dimensions	51 x 51 cm
Overall height	42 cm
Availability of spare parts	Yes

### Technology

A technology that enables **HDPE polyethylene** to be formed into designer furniture from the **Outi collection**. As a result, each piece is both durable and unique.

### Warranty

#### Lifetime

The warranty covers the durability of components made of HDPE (high-density polyethylene), as well as the structural integrity of components made of black steel that has been powder galvanized and powder coated, stainless steel, and components made of hot-dip galvanized steel.

#### 10 years

The Guaranty covers all flaws of the elements made of HPL, HDPE, stainless steel, hot-dip galvanized steel, wooden elements (pine, spruce), revealed during usage, which arise from manufacturing reasons.

#### 5 years

The Guaranty covers all flaws of the elements made of powder coated steel, aluminum, laminate, ropes, elements made in rotomoulding technology, elements made of polyamid, polypropylene elements, revealed during usage, which arise from manufacturing reasons.

#### 2 years

The Guaranty covers all flaws of the elements made of rubber, moving elements ( bearings, joints), electronic elements, elements made of EPDM, elements made of plywood and other not mentioned before revealed during usage, which arise from manufacturing reasons.

## Product description

### 6501 Straight Bench

Dimensions:

- Product dimensions: 51 x 51 cm
- Overall height: 42 cm

The Stool is a compact seating module with universal application. It can be used as an individual seat or as a complementary element within larger arrangements. Its small size allows for easy relocation and reconfiguration of space.

It is part of a series of modular furniture designed for public spaces, characterised by high durability and configurational flexibility. The forms are based on smooth lines and rounded geometric transitions, enabling the creation of cohesive arrangements with varied functions and scales. The collection is manufactured using rotomoulding technology with HDPE (high-density polyethylene) granulate, ensuring a uniform material structure, high mechanical resistance, and durability under intensive use. At the same time, it provides resistance to UV radiation, moisture, temperature fluctuations, and mechanical damage, making the elements suitable for both indoor and outdoor environments.

## Installation method

## Materials

Rotomoulding technology with HDPE (high-density polyethylene) granulate, ensuring a uniform material structure, high mechanical resistance, and durability under intensive use. At the same time, it provides resistance to UV radiation, moisture, temperature fluctuations, and mechanical damage.
