

- 1 Slides made of stainless steel AISI 304. Metal sheet with a thickness of 2 mm formed in a CNC technique. Side panels made of HDPE polyethylene 12 mm, in the highest quality and totally damp-proof and resistant to UV.
- 2 Solid construction made of black steel S235JR, cleaned in the sandblasting process. All elements made of black steel are subjected to a two-layer powder coating process, which includes the following stages: First layer – zinc-rich primer, Second layer – topcoat in RAL colour
- 3 Soft coniferous wood, with a crosssection of 90 x 90 mm, coreless, bonded with waterproof polyurethane adhesives. Undergoing a two step wood finishing system.
- 4 Anti-slip anthracite 10 mm HPL platform plate with a very high resistance to weather conditions and attrition.
- 5 Plates of the walls made of colourful triple layered 12 mm HDPE polyethylene, in the highest quality, totally damp-proof and resistant to UV.
- 6 Polypropylene ropes type pp-multisplit with a steel core and a diameter of 16 mm.
- 7 Safe post covers made of injection moulded polyamide.
- 8 Rope ladder steps and rope knots made of injection moulded polyamide.
- 9 Rope ends pressed in sleeves made of durable aluminium alloys.

MATERIAL SPECIFICATION

Wood / steel

Walls

LIFETIME

The warranty covers the durability of components made of HDPE (high-density polyethylene), as well as the structural integrity of components made of black steel that has been powder galvanised and powder coated, stainless steel, and components made of hot-dip galvanised steel.

15
YEARS

Includes defects in elements made of Robinia, identified during use, arising from manufacturing causes.

10
YEARS

Includes defects in components made of HPL as well as glued laminated timber (pine and spruce), identified during use and arising from manufacturing causes.

5
YEARS

Includes defects in components manufactured from aluminium, laminate, by means of rotomoulding technology, from polyamide, and polypropylene ropes with a steel core – identified during use and arising from manufacturing causes. It also covers the corrosion resistance of steel components that have been powder galvanised and powder coated.

2
YEARS

Includes defects in rubber components, movable parts, electronic elements, those made of EPDM, plywood, and exotic IROKO wood, as well as other items not listed below, identified during use and arising from manufacturing causes.

All materials give in to the natural ageing of products. During the time pass their esthetical properties can get worse. It's a process, which will not influence the durability of the product and its' safety. Acceptable are changes in the intensity of the colour of the coloured elements, cracks of wood and abrasion or damages of the paint coating arising out of normal exploitation (considers mainly steps of the ladders, handles, ropes, platforms and connectors). Stainless steel AISI304 is not intended to be used in aggressive environment. Equipment installed in costal areas or near salty or chlorinated water and in areas where acid rains or different aggressive environmental factors occur, corrosion center may occur.

BUGLO's responsibility of this guarantee does not cover flaws which arise in consequence of:

- not following the rules of proper usage or vandalism,
- doing repairs or modifications by persons not authorised by BUGLO,
- faulty montage made by the buyer,
- events and natural disasters such as flood, fire and gusty wind.
