# Urbanıq Relax

## We create spaces that work for everyone

Imagine a warm afternoon in the park. You're surrounded by greenery, birdsong, and the pleasant shade of trees. It's the perfect moment to relax with your favourite book or meet up with friends. Ideally, it's a beautiful space, with peaceful surroundings... and you're sitting on **comfortable furniture**.

The Urbaniq collection of urban furniture began with a simple need: to create comfortable spots for relaxation in Buglo playgrounds. But it quickly became clear that this was just the beginning. Today, Urbaniq is a respected collection of urban furniture, proudly developed and designed to help create thoughtful, functional spaces that are welcoming for everyone.

# Urbaniq Relax

Do you prefer relaxing alone with a book or meeting up with friends? Urbaniq's Relax collection makes both options equally enjoyable. Ergonomic shapes and modular solutions allow you to tailor the space to your needs: from classic benches and comfortable loungers, to benches that can be combined in various configurations, creating either more intimate zones or open spaces for social interaction.

We're no strangers to inclusivity. In cities, there are hardly ever places where parents can comfortably change their little ones, which is why we have introduced fantastic changing stations.

Do you like to play with colour in a space or do you have an area that begs for bold accents? In addition to products made from **HPL and robinia or iroko wood**, we also offer furniture made from perforated **stainless steel combined with black steel**. The elements can be painted in any colour from the Buglo palette. We, of course, chose orange. It's our favourite! But there are many more options, so you can tailor the furniture to your preferred style, space and functional needs.

## DURABILITY

All urban furniture is made from resilient materials: it withstands both the weather and acts of vandalism.

## INTEGRATION

An urban relaxation area encourages people to spend time together and fosters community interaction.

## COMPREHENSIVENESS

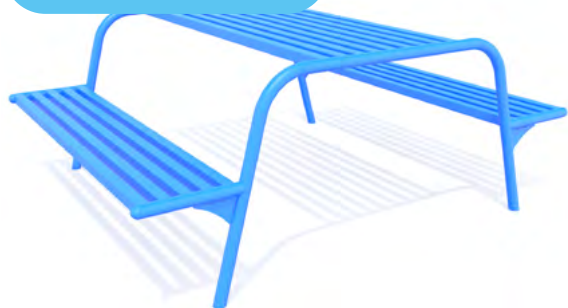

A rich and varied range of equipment allows for the creation of a complete, functional outdoor relaxation space.

robinia wood

black powder coated  
steel

If you want furniture that requires no daily maintenance or care, choose **HPL** – a material resistant not only to changing weather conditions but also to vandalism! It is practically maintenance-free, making it effortless to care for. If you prefer wood, go for **robinia wood** – a material so dense that it doesn't require a protective coating, while still maintaining exceptional durability.

# UrbanIQ Modular

Ready-made solutions don't suit every space. That's why we created modular benches that can be joined at angles of 15, 30, 60, or 90 degrees. This allows you to create both open meeting areas and more intimate relaxation spots. UrbanIQ Modular helps a space adapt to its users.

# Urbanig Play

Our speciality is encouraging outdoor play. That's why the Urbanig Play category was created! These are pieces of furniture that inspire shared fun and integration. Chess, draughts, or perhaps Ludo? Players can enjoy all these games in the city! And if you have another favourite game, that's no problem! With **Custom Art Master** technology, we can create a board designed just for you.

# UrbanIQ Architecture

Some things seem obvious - until they're missing. Where do you park your bike? Where do you recycle an empty bottle? How do you bring a touch of greenery into a concrete space? **UrbanIQ Architecture is small-scale street furniture** that solves big problems.

**Litter bins** help keep spaces clean. They are designed to blend harmoniously into any spatial arrangement.

**Planters** bring greenery to any urban space. They are not only aesthetically pleasing, but also practical and made from durable materials.

**Bike racks** encourage an active lifestyle. Functional and stylish, they support sustainable transport and add character to urban spaces.

Razem te elementy tworzą spójne i harmonijne otoczenie, które zachęca do relaksu i spędzania czasu na świeżym powietrzu.

# Create something unique with us!

Want to adapt a ready-made product to your needs? No problem! We can change the layout, dimensions, and colours.

What you can see in this booklet are our proven solutions. But this is just the beginning! **Buglo's Custom Projects Team** produces unique, tailored designs customised to fit every space and requirement.

Robinia wood gazebos in selected colours? Large city name signs where you can relax or spend time with friends? These are just a few examples. The possibilities are endless! It all comes down to your imagination, and we have the skills and experience to bring it to life!

# A space full of values

- 1 Inclusivity.** We think of everyone! Thanks to well-designed benches with armrests, seniors won't have any trouble getting up. Meanwhile, teenagers will certainly appreciate the hammocks and loungers: perfect spots for relaxing, chatting, and spending time together. For parents, we have changing stations, making it easy for them to take care of their little ones in public spaces.
- 2 Integration.** Urbaniq allows you to create a space that encourages shared gatherings. Thanks to this flexibility, you can easily adapt open areas to foster social interaction.

**3 Ecology.** Sustainable transport is very important. Bike racks encourage an active lifestyle, while recycling bins help keep spaces clean. At the same time, Urbaniq planters bring greenery to the urban landscape, softening the harsh concrete and offering your eyes a moment of rest, shade, and calm in the city's hustle and bustle.
